## **DEPARTMENT OF COMPUTER SCIENCE**

Subject: Minutes of the DARC Meeting (SP-24), Date: 29 July 2024 at 12:00 PM

Venue: New Conference Room, Chair: HoD CS, Attendees: DARC Members

The following minutes document the proceedings of the DARC meeting, which commenced with an invocation. The meeting was held to address the shortcomings highlighted by the mock visitation team during their visit on July 9, 2024.

1. Importance of NCEAC Accreditation: The HoD (CS) explained the significance of NCEAC accreditation and the complexity of the newly introduced forms required for accreditation applications.
2. Course Folders: Dr. Faisal Azam provided an update on the current status of course folders shared by the faculty. He mentioned that most faculty members are maintaining course folders on Google Drive. However, according to NCEAC requirements and the feedback from the mock visitation team, the current course folders do not meet final standards. Therefore, Dr. Faisal Azam will send an email detailing the discrepancies found in the course folders and provide a checklist for all faculty members to ensure their folders meet the required standards.
3. Presentation of Evidence in Hard Copy: The HoD (CS) discussed the comments and shortcomings highlighted by the mock visitation team in terms of evidences requirement in hard form. The following decisions were made based on their feedback:
  - a) Due to recent changes, the Industrial Advisory Board (IAB) will be reconstituted with new alumni, industrial, and academic members to obtain updated feedback and trends from the market and academia. Dr. Muhammad Bilal will maintain documentation related to the IAB, Open Houses, and industrial liaison.
  - b) Dr. Jamal Hussain Shah will maintain data related to alumni, internships, and student participation in national/international events.
  - c) All faculty members must update and maintain their course folders according to NCEAC requirements.
  - d) Domain Heads will monitor, guide, and assist faculty members within their domains to implement Outcome-Based Education (OBE) effectively.
4. FDA Training on July 30, 2024: It was decided that all faculty and staff of the CS department will attend the training session on July 30, 2024, as directed by campus administration.
5. Evaluation Process for Final Year Projects (FYP): Instances have been noted where not all members of the viva committee were present, leading to potential student concerns and complaints regarding their grades. Therefore, it is important for the Viva Committee Head to ensure that all members, including any replacements, are present during each viva session.

The meeting concluded with a vote of thanks.
